

Blum, Inc. is a leading manufacturer of functional hardware for the kitchen cabinet and commercial casegoods industries specializing in lift systems, concealed hinges, and drawer runner systems. Virtually all of the hardware needed to assemble and make cabinets functional are available within the wide range of quality Blum products.

Blum's manufacturing and distribution facility in Stanley, North Carolina supplies the North American markets through a network of more than 150 dependable distributors. Wholly owned by the Blum family, the company was formed in 1952 by Julius Blum and is headquartered in Hoechst, Austria.

Global customer benefits

Product development at Blum considers all of the various customers who will come in contact with our products.

With this "Global Customer Benefits" philosophy we strive to create advantages for all users from the manufacturer to the end consumer.

Blum, Inc. is ISO 9001 certified which means that you are assured of consistent quality in every Blum product. What's more they exceed the requirements of ANSI/BHMA standards for cycle life, static load and self-closing performance. Contact your local Blum representative for more details.

Opening action – easier than everything that has come before

AVENTOS HL is a lift system that provides a comfort of motion that is sure to impress. AVENTOS HL doors open effortlessly, and thanks to BLUMOTION, come to a gentle halt. Its elegant

yet simple design makes it easy to integrate the lift hardware into the cabinet and the high-quality cover caps for AVENTOS HL give the cabinet interior a modern look.

Integrated BLUMOTION – silent and effortless closing

Regardless of how heavy the door or whether it's closed with force, it will close silently and effortlessly every time.

BLUMOTION on AVENTOS HL provides:

- ▶▶ Doors swing downward ...
- ▶ ... are brought to a gentle halt and ...
- ... close silently and effortlessly.

Overview

Few parts – many applications

Although the program only consists of a few parts, AVENTOS HL covers all common door widths and heights. The small product line simplifies planning, ordering, and inventory.

Fast assembly and removal

An experienced kitchen installer will remove the door when mounting a wall cabinet. This protects surfaces and makes the cabinet lighter. With AVENTOS HL, the door can be removed simply and quickly via the integrated CLIP technology.

In this way, the cabinet can be quickly, easily and securely attached to the wall for the final assembly. Assembly into the cabinet takes just a few steps:

The lift mechanism is attached. When installing the lever arm HL requires no tools.

The stabilizer is attached to the lift mechanism for optimal side stability.

Attachment of symmetrical mounting plate to the door.

The attachment to the door uses CLIP technology.

WARNING

Arm assembly can spring up and cause injury without door attached

- Do not push arm assembly down
- Remove mechanism before installing or removing cabinet
- For questions call 1-800-438-6788 or go to www.blum.com

Fast and precise adjustment

The AVENTOS HL door can be adjusted in three dimensions. The result is that a perfect alignment can be achieved on site. The tension adjustment feature is used to fine tune the opening and closing power. Adjustment is easy and enables the power to match the size and weight of the door.

Exact door adjustment using the 3-dimensional adjustment feature.

Variable adjustment on the power setting means that the strength of the mechanism can be matched to each door.

Features

Extremely durable

With AVENTOS HL, your customers can feel the quality of Blum hardware every time they open and close the door. The core of this lift mechanism is a robust spring assembly that is very durable and includes BLUMOTION silent closing.

No protruding parts

There are no protruding parts thanks to the removable arm assembly on AVENTOS HL. This provides improved safety for cabinet manufacturing, transport and installation.

Design options

AVENTOS HL is a great solution for upper cabinets, especially ones with another cabinet above. Blum also offers a special arm assembly for use in an appliance garage.

AVENTOS HL offers numerous design options including wooden doors and aluminum frame doors.

Decorative molding clearance

When developing the AVENTOS HL, we also took into account cabinets with decorative mouldings. The design options are limitless.

Using this catalog

Step 1: Determine your application

Go to the page for your application: face frame page 9, panel page 11, or narrow frame aluminum door page 13. Appliance garage applications start on page 15.

Step 2: Determine the required arm assembly and lift mechanism

Use the chart on the corresponding application page to determine the proper (a.) lift mechanism and (b.) arm assembly based on the height of the cabinet and weight of the door (including handle).

Determining required lift mechanism

Cabinet height	Arm assembly	Lift mechanism (door weight - lb / oz)				
		20L2100.NA	20L2300.NA	20L2500.NA	20L2700.NA	20L2900.NA
300 - 349	20L3200	2 / 12 - 8 / 7	8 / 8 - 13 / 7	13 / 8 - 25 / 4	25 / 5 - 44 / 0	
350 - 399	20L3500	2 / 12 - 4 / 10	4 / 11 - 10 / 2	10 / 3 - 18 / 10	18 / 11 - 28 / 4	28 / 5 - 44 / 0
400 - 550	20L3800		3 / 13 - 6 / 13	6 / 14 - 13 / 11	13 / 12 - 24 / 7	24 / 8 - 44 / 0
450 - 580	20L3900		2 / 3 - 3 / 4	3 / 5 - 10 / 6	10 / 7 - 19 / 3	19 / 4 - 36 / 5

Step 3: Select proper hardware set

Select the proper hardware set based on the intended application.

Wood/wide aluminum door application

	Part no.
Hardware set	20S4200.L1

Narrow aluminum door application

	Part no.
Hardware set	20S4200AL1

Step 4: Determine mounting location for lift mechanism

Use the diagram for the appropriate application to determine the lift mechanism locating pin positions and pre-bore them in the cabinet sides.

For face frame applications, cabinet sides must be blocked out.

Step 4: Space requirement

Locating pin positions

Arm assembly	Cabinet height	Min. Y	a	b*	c*
20L3200	300 - 349 (11-13/16" - 13-3/4")	262	114	257	241
20L3500	350 - 399 (13-13/16" - 15-13/16")	312	146.5	345.5	331
20L3800	400 - 550 (15-3/4" - 21-5/8")	362	178.5	434	419
20L3900	450 - 580 (17-11/16" - 22-13/16")	412	211	522	507

* based on 1-1/2" face frame

Step 5: Determine location for the mounting plates

Use the diagram to determine the mounting plate position and attach them to the door.

Use a mounting plate with bracket if the mounting plate center line is in less than 6mm from the center panel.

Step 5: Mounting plate position

Arm assembly	X
20L3200	153
20L3500	203
20L3800	253
20L3900	303

Part no.
20S4200
Mounting plate

Mounting plate with bracket

Use the standard mounting plate (20S4200) for solid doors or on five piece doors when the mounting plate center line is in more than 6mm from the center panel.

The mounting plate with bracket (20S4F01) is required when the mounting plate center line is in less than 6mm from the center panel.

Part no.
20S4F01
Mounting plate with bracket

Step 6: Cut Stabilizer rod

Cut the stabilizer rod to the proper size for the cabinet using the formula:

Length = Interior cabinet opening minus 122mm

Step 6

g Oval stabilizer rod

Cut to length

Length = Interior cab. opening - 122 mm

Aluminum
1061 mm (41-7/8")

Part no.
20Q1061UA

Step 7: Begin assembly

Now move to the Assembly instructions on page 23

Wood or wide aluminum door for face frame applications

Determine required parts

To determine the required lift mechanism and arm assembly for any application, find the weight of the door (including handle) and cabinet height. Use the chart below.

NOTE: Face frame cabinets must be blocked out flush with the frame on the sides to mount the AVENTOS HL lift mechanisms.

20L2700.NA
20L2900.NA

Step 2b **f Arm assembly set**

f 2 x Arm assemblies (right and left)

Cabinet height

450 - 580 (17-11/16" - 22-13/16")

Part No.

20L3900

Step 6 **g Oval stabilizer rod**

Cut to length
Length = Interior cab. opening - 122 mm

Aluminum

1061 mm (41-7/8")

Part no.

20Q1061UA

Step 3: h Wood/wide aluminum door hardware set

Set includes:

- h** 2 x 20S4200 Wood/wide aluminum mounting plate
- h** 2 x 20S4F01 Wood/wide aluminum mounting plate with bracket
- 22 x 606P Wood door screws for 20S4200*
- 18 x 7072A Aluminum door screws for mounting plates*
- POZI #2x2 driver bit for adjusting tension

* only 8 screws required

Part no.

Hardware set

20S4200.L1

Installation

Step 4: Space requirement

Locating pin positions

Mounting hole locations

The included #7 x 35 mm (1-3/8") wood screws are required in the five holes marked in orange.

NOTE: Face frame cabinets must be blocked out flush with the frame on the sides to mount the AVENTOS HL lift mechanisms.

Mechanism protrusion

Arm assembly	Cabinet height	Min. Y	a	b*	c*
20L3900	450 - 580 (17-11/16" - 22-13/16")	412	211	541	526

* based on 19mm top panel

Step 5: Mounting plate position

Arm assembly	X
20L3900	303

Mounting plate

Mounting plate

Part no.
20S4200

Appliance garage for narrow aluminum door applications

Determine required parts

To determine the required lift mechanism and arm assembly for any application, find the weight of the door (including handle) and cabinet height. Use the chart below.

Using this catalog
Installation & removal

page 7
pages 23 - 25

Determining required lift mechanism

Cabinet height	Arm assembly	Lift mechanism (door weight - lb / oz)			
			20L2300.NA	20L2500.NA	20L2700.NA
450 - 580	20L3900		2 / 3 - 3 / 4	3 / 5 - 10 / 6	10 / 7 - 19 / 3
					19 / 4 - 36 / 5

Required parts

Step 2a

a thru **e** Lift mechanism set

Set includes:

- a** 2 x Lift mechanisms
- b** 2 x Cover plates (right and left)
- c** 2 x Cover caps
- d** 2 x Stabilizer rod cover caps
- e** 2 x Stabilizer rod adapters
- 18 x #7x35mm (1-3/8") wood screws*
- * only 10 screws required

Part No.

20L2300.NA
20L2500.NA
20L2700.NA
20L2900.NA

Step 2b

f Arm assembly set

- f** 2 x Arm assemblies (right and left)

Cabinet height

450 - 580 (17-11/16" - 22-13/16")

Part No.

20L3900

Step 6

g Oval stabilizer rod

Cut to length

Length = Interior cab. opening - 122 mm

Aluminum

1061 mm (41-7/8")

Part no.

20Q1061UA

Step 3: **h** Narrow aluminum door hardware set

Set includes:

- h** 2 x 20S4200A Narrow aluminum mounting plate
- 18 x 699.110 Aluminum door screws for narrow frame aluminum doors*
- POZI #2x2 driver bit for adjusting tension

* only 8 screws required

Hardware set

Part no.

20S4200AL1

Installation

Step 4: Space requirement

Locating pin positions

Mounting hole locations

The included #7 x 35 mm (1-3/8") wood screws are required in the five holes marked in orange.

NOTE: Face frame cabinets must be blocked out flush with the frame on the sides to mount the AVENTOS HL lift mechanisms.

Mechanism protrusion

Arm assembly	Cabinet height	Min. Y	a	b*	c*
20L3900	450 - 580 (17-11/16" - 22-13/16")	412	211	541	526

* based on 19mm top panel

Step 5: Mounting plate position

Arm assembly	X
20L3900	303.5

Planning narrow aluminum frames

Narrow aluminum mounting plate

Part no.

20S4200A

Universal individual template

- Use to pre-bore for AVENTOS locating pins
- Also can be used for marking and preboring of mounting plates

Set includes:

- Template
- Ø2.5 mm stop collar
- Ø5 mm stop collar

Template
Ø5mm drill bit

Part no.

65.1051

DB-5mm

Screws

Aluminum door screws

Use to attach mounting plates to doors (aluminum door applications)

Part No.

For narrow aluminum door mounting plates

699.110

For wide aluminum door mounting plates

7072A

Deep thread wood screws

Part No.

For wood door mounting plates

606P

Bumpers

Cushions door closing
Self-adhesive back; clear

Part no.

Ø6(1/4") x 1.5(1/16")

FX4041

Ø10(3/8") x 3(1/8")

SJ5312

POZI DRIVER and bits

A POZI screwdriver (different from Phillips) is the most crucial tool you can use to assure that full torque is applied to all Blum mounting screws. POZI screws can be identified by the distinctive "tick" marks located in the center of the screw head recess.

Part no.

#2 POZI DRIVER

POZI DRIVER

1/4" bit holder

BIT HOLDER

#2 x 1" POZI bit insert

POZI BIT #2x1

#2 x 2" POZI bit insert

POZI BIT #2x2

The AVENTOS line

AVENTOS HF bi-fold lift system

The doors fold in the middle when opening. This ensures easy access to the handle in any position for high wall cabinets.

AVENTOS HS up and over lift system

The door swings gently over the cabinet and makes storage space easily accessible. The space requirement over the cabinet is also kept to a minimum.

AVENTOS HK stay lift system

The door swings straight up. Applications include above refrigerator, accent cabinets or wall cabinets.

AVENTOS HL lift up system

The door opens vertically. This is ideal for an appliance garage or wall cabinets.

Assembly

Step 1: Complete an AVENTOS planning worksheet

Go through the "Using this catalog" steps on pages 7 - 8 or complete an AVENTOS planning worksheet (available on www.blum.com). This will help you determine required hardware and necessary cabinet preparation.

Step 2: Install the lift mechanism

- a. Use the AVENTOS template to pre-bore the locating pin holes for the AVENTOS HL lift mechanism.
- b. After aligning the lift mechanism with the cabinet using the locator pins, attach the mechanism with the five mounting screws provided.

5 x wood screws #7 x 35 mm

Step 3 Attach the Arm assemblies

- a. Attach the arm assembly to the lift mechanism as shown.
- b1. Insert lower part of arm into lift mechanism (see close-ups)
- b2. Lift up on the arm assembly to lock into place.

Step 5: Be aware

WARNING

Risk of injury by spring-loaded arm

- Do not push arm assembly down or leave in the down position
- Remove arm assembly from mechanism before installing or removing cabinet

Step 4: Prepare and attach stabilizer rod

After cutting to size, slide the stabilizer arm cover caps onto the rod. Insert the stabilizer rod adapters into the rod (1). Then slide the stabilizer rod into the assembly arms (2&3) and tighten the locking screw (4). Finally, slide the cover cap over the each end of the rod (5).

Step 6: Attach the door

Attach the door using the CLIP mechanism in the mounting plate.

Step 7: Adjust the door tension

Use a screw gun and the supplied #2x2 POZI driver bit to adjust the lift mechanism to the desired tension.

Tension should be the same on both lift mechanisms.

Step 8: Finalize the door adjustments and attach covers and cover caps

- Use a POZI screwdriver to adjust cam adjustments for each of the 3-dimensional adjustments.
- Snap the symmetrical cover caps on each cover plate. Place the left and right cover plates over the appropriate lift mechanisms and snap them in place.

Step 1: Be aware

WARNING

Risk of injury by spring-loaded arm

- Do not push arm assembly down or leave in the down position
- Remove arm assembly from mechanism before installing or removing cabinet

Step 2: Remove the door and covers

- a. Open the door. 1. Support the door with one hand and push down tab to disengage the CLIP mechanisms of the Arm assemblies from the mounting plates. 2. Lift the door off the mounting plates.
- b. Remove the cover caps and cover plate.

Step 3: Remove the stabilizer rod

- a. Pull back the stabilizer rod cover caps and loosen the locking screws on each end of the stabilizer rod.
- b. Remove the Stabilizer rod from the cabinet.

Step 4: Remove the arm assembly

- a. Use a screwdriver to disengage both arm assemblies as shown.
- b. Remove arm assembly from mechanism.

Cabinet is now ready for transport.

NOTE: Both tabs must be disengaged
