

AVENTOS HS

The up-and-over lift system

AVENTOS HS is Blum's new up-and-over lift system solution for upper cabinets. Its elegant yet simple design makes it easy to integrate the hardware into the cabinet. The high-quality cover caps for AVENTOS HS give the cabinet interior a finished look.

AVENTOS HS covers common cabinet widths and heights with a complete program. This product line simplifies ordering, planning and warehousing.

Opening action

With AVENTOS HS, even heavy doors can be opened effortlessly.

Quiet closing

BLUMOTION silent closing is integrated in the mechanism for an amazingly quiet closing every time.

Features

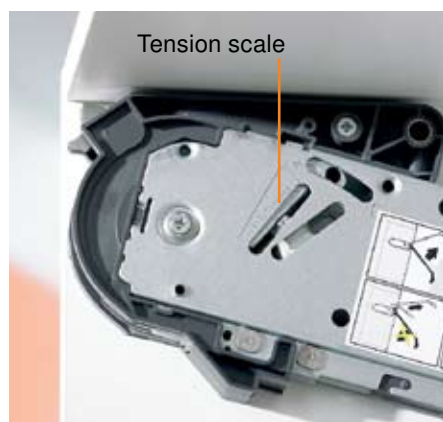

- Silent and effortless opening and closing thanks to BLUMOTION
- Quick, easy assembly and removal thanks to CLIP technology
- Easy, 3-dimensional door adjustment
- Integrated tension adjustment for door weight
- Calibrated scale for accurate adjustment

Benefits

- Works for both frame and panel cabinet applications
- Requires only a minimal force to open and close
- No protruding parts for easier transportation of cabinet
- Easy and precise adjustment of door position and tension
- Provides clearance for crown moldings

Simple program

AVENTOS HS is suitable for cabinet widths up to 48" and for cabinet heights from 13-3/4" to 31-1/2". Two lift mechanisms, the associated lever arms and a stabilizer rod are used for each cabinet width.

No protruding parts

There are no protruding parts because of the removable lever arm on AVENTOS HS. This provides improved safety during cabinet manufacturing, transport and installation.

Fast assembly

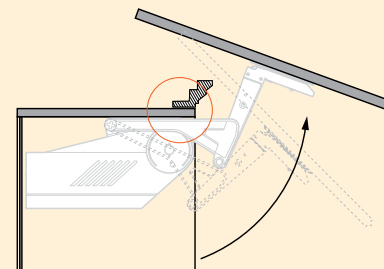

With AVENTOS HS, the door can be removed simply and quickly. After the cabinet is attached to the wall, the door can be reattached just as easily.

Easy and precise adjustment

The door can be easily adjusted enabling you to perform side, height and tilt adjustments precisely.

Crown molding clearance

When developing the AVENTOS up & over lift mechanism, we also took into account cabinets equipped with projecting elements such as crown molding. This provides you more room for design during kitchen planning.
