

Features

- BLUMOTION integrated into the hinge cup
- New geometry for door thicknesses up to 26 (1")
- New INSERTA design
- Boring distance range 3-7mm
- Press-in hinges must be inserted with knock-in tool or universal insertion ram

Hinge cup centerpoint

Cup centerpoint is the MINIPRESS or MINIDRILL fence depth position.

New geometry for thick door applications
Minimum reveals increase with door thickness. The following applications show common examples of necessary reveal and door gap for each door thickness.

The factory setting for the door gap (distance between the back of door and front of side panel/frame) is 1.5 mm . For full opening angle without contacting the side panel or frame, the gap behind the door and the minimum reveal must be adjusted according to the table below.

NOTE: All dimensions based on 1 mm door radius

| $3 / 4 "$ thick door |  |  |
| :---: | :---: | :---: |
| Minimum <br> reveal | B <br> Bore | Minimum gap <br> behind door |

## Angle restriction clip

Restricts opening angle of the CLIP top BLUMOTION hinge to $86^{\circ}$. Angle restriction clip can be inserted after the hinge has been installed.

## Hinge cup cover cap

For use with CLIP top BLUMOTION hinges only. Suitable for screw-on, press-in and EXPANDO hinge cups.
